

Hab. Lost med note = How may have real problem  
right now = a greater problem is how to get direction from  
G, stay in his will - a coming action -  
Text = Hab's complaint = "Why do you allow it?"  
'What are you going to do about it?' - The Sovereignty of G  
has to work by G - seek God's guidance - know what to do  
we must pass thru the valley of complaint - but don't  
stay there! after we have cried to the Lord, publish it,  
- God was at his end - what error -

1 - watch = "look forth" - a careful, intense  
vigilance - to see what G is going to do - watch for His  
indications = Hab doesn't run out trying different solutions -  
1 - a definite decision to withdraw & watch to see what  
G is going to do & say = look for indications of how He will  
work

2 - a proper place = tower = symbolizes place of prayer  
"watch & pray"  
3 - watching G with a confession of ignorance & an  
expression of wonder = wonder = why or important  
G never make the blunder of trying to predict the  
way G is going to answer your prayer - wring out  
propelled by your own calculations & make a mess of things

a - Abel & Ishmael = did the best he knew to do  
b - Moses & slain Egyptian = did the best he knew  
(2) when sensory wonder gives way to sense of - when in trouble  
"knowing always what G will do & how he will do it" G is not  
predictable

(3) FAITH in what G has done & not in the G who did it!  
Just because he did a certain thing once  
24 = Abel & Isaac = "G said kill him, then spare him -"  
This must be the devil, I'll kill Isaac"  
Hab. was waiting, expecting a rebuke, ~~but~~ got a vision instead  
"The wind bloweth where it willeth" Psa 115:3

Be wary any belief, stand, etc that cramps the Sovereignty of G
