

A CORN OF WHEAT—JOHN 12:23–26

7 STAGES FROM SEED TO FRUIT

1. It must soften.
2. It begins to enlarge.
3. There is a chemical change - from starch to sugar.
4. The seed bursts open.
5. Rootlets are sent out. (prayer to us)

These first 5 processes are all underground.

This must happen ^{IN} our life.

6. A green stem appears above earth. (We witness)
7. Then the seed begins to produce fruit.
